

About Us:

Burall InfoSmart Ltd. has a long standing tradition of success in delivering Smart Card Solutions to Universities. From introducing the first multi-application campus card with the University of Southampton in 1998 to supplying over 350,000 cards to Universities each year, we are experts in providing card bureau and software services.

- Students Union
- So Much More

Product Services:

CMS & Card Production:

Personiq is a truly flexible CMS and card production solution! Each University requires different interfaces and compatibility with existing systems, which is why our Personiq CMS and in-house card production printers have been developed to be fully flexible and customisable to each University and can interface with all your legacy systems. Plus the ability for our CMS to evolve and add new apps as you do means you can future proof your campus card management.

Bureau Services:

Our high quality bureau combines both traditional desktop and state-of-the-art Digital Printing for mass-personalisation of staff and student cards at low cost but highest quality using bulk packaging or individualised fulfilment and mailings.

Transport & ePurse Integration:

As founder members of ITSO we help HEI's to make cards which work with local and national transport schemes. We can also integrate closed-purse schemes such as sQuid into our systems.

Printers and Consumables:

As Zebra Card Specialist Resellers we can provide the latest printers for occasional use through to the commissioning of a fully-capable in-house bureau.

Accessories:

We supply a wide range of wallets, clips, lanyards and yo-yo's to complete your card requirements.
